Letter of Transmittal from the Treasurer

Dan McAllister
San Diego County Treasurer - Tax Collector

December 27, 2007

**Board of Supervisors and Treasury
Oversight Committee
County of San Diego
San Diego County Administration Center
San Diego, California 92101**

I am pleased to submit the Comprehensive Annual Financial Report (CAFR) of the San Diego County Investment Pool (the "Investment Pool") for the year ended June 30, 2007. This report and the annual audit are presented to demonstrate compliance with Section thirty-three of the Investment Pool's Money Fund Investment Policy (the "Investment Policy"). Responsibility for both the accuracy of the data and the completeness and fairness of the presentation, including all disclosures, rests with the management of the Treasurer's Office.

To the best of our knowledge and belief, the enclosed data are accurate in all material respects, and are reported in a manner designed to present fairly the financial position and changes in financial position of the Investment Pool in conformity with accounting principles generally accepted in the United States of America (GAAP) and audited in accordance with auditing standards generally accepted in the United States of America by a firm of licensed certified public accountants. All disclosures necessary to enable the reader to gain an understanding of the Investment Pool's financial activities have been included.

The Investment Pool's financial statements have been audited by Macias Gini & O'Connell LLP, a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable

assurance that the financial statements of the Investment Pool for the year ended June 30, 2007, are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unqualified opinion that the Investment Pool's financial statements for the year ended June 30, 2007, are fairly presented in conformity with GAAP. The independent auditor's report is presented as the first component of the financial section of this report.

Management provides a narrative introduction, overview and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to compliment the MD&A and should be read in conjunction with it. The Investment Pool's MD&A can be found after the independent auditor's report.

Profile of the San Diego County Investment Pool

The San Diego County Investment Pool (the "Investment Pool") was created when the State Legislature established the five-member County Board of Supervisors in 1853. It is a local government Pool with \$4.6 billion in assets as of June 30, 2007. The Investment Pool is headed by the San Diego County Treasurer-Tax Collector, an elected official that is responsible for tax collection, banking, investment, disbursement and accountability of public funds. The Investment Pool is managed by the Treasurer's Office on behalf of the Investment Pool participants. The County portion of the Investment Pool assets as of June 30, 2007 is \$1.9 billion while the external portion that is not part of the County is \$2.7 billion. Depositors in the Investment Pool include both Mandatory and Voluntary participants located within the County

of San Diego (see Investment Pool Participants Composition list and chart, page 37).

Mandatory participants include the County of San Diego, K-12 school districts, and various special districts and accounts controlled by the County Board of Supervisors. Mandatory participants are defined as those agencies required by law to deposit their funds with the County Treasurer's Office. Mandatory participants comprise the majority of the Investment Pool's assets, approximately 98% as of June 30, 2007.

Voluntary participants are those agencies that are not required to place their funds in the Investment Pool, and do so only as an investment option. Voluntary participants include cities, fire districts, and various special districts. As of June 30, 2007, Voluntary participants accounted for approximately 2% of the Investment Pool.

Community Colleges fall somewhere between Mandatory and Voluntary participants. While they have the authority to invest funds outside of the Investment Pool, they receive banking, checking, and investment services from the County. They are included in the 98% Mandatory participants.

In addition to investment management, the Treasurer's Office also provides banking services to all Non-Voluntary Participants. These services include, but are not limited to, warrant redemption, Automated Clearing House (ACH), Federal Wire payments, acceptance of deposits, fund accounting, and account reconciliation.

Investment Policies and Practices

The primary objectives of the Investment Pool, as set forth in the Investment Policy, in order of importance, are safety, liquidity, and yield. The following goals have been set for the next fiscal year 2007/2008:

- Promote fiscal stability by maintaining 'AAA' rating from Standard & Poor's rating service.
- Improve investment benchmark management process by developing one additional analytical application.

- Improve constituent outreach by increasing public awareness of services offered by the Investment Division.
- Obtain a certificate of achievement for excellence in financial reporting by the Government Finance Officers Association.

The Treasurer's Office prepares the Investment Policy on an annual basis, to ensure the integrity of the Investment Pool and provide guidelines for its operation. Upon completion of the Investment Policy by the Treasurer's Office, it is presented for review to the Treasurer's Oversight Committee, and then to the County Board of Supervisors for their approval at a public meeting.

The maturity distribution of the Investment Pool is limited by the Investment Policy, which places restrictions on the securities that may be purchased. Cash temporarily idle during the year was invested in negotiable certificates of deposit, obligations of the U.S. Treasury, U.S. government agencies, commercial paper, corporate bonds and medium-term notes, asset-backed securities, money market mutual funds, repurchase agreements and collateralized certificates of deposit. The maturities of the investments range from one day to five years, with an average weighted maturity of 171 days. The weighted average effective yield (annualized) on investments as of June 30, 2007 was 5.23%. To safeguard the investments, a custodian is employed to safekeep, settle, and accept interest payments on investments held by the Investment Pool. To facilitate internal security and safeguards, the Investment Policy requires an annual audit and the establishment and maintenance of internal controls and procedures. For the 2006/2007 fiscal year, investments provided a 5.00% apportionment rate, which is the rate used in allocating the net earnings to the participants. The Investment Pool's average rate of return over the last three years was 3.57% and 2.92% over the last five years. The Treasurer's Office has implemented a system of internal controls designed to ensure the reliability of reported investment information. The

Treasurer's Office provides monthly and quarterly investment reports to the Board of Supervisors, who then reviews this information as part of their monitoring and oversight function. Furthermore, the Board of Supervisors has established the Treasury Oversight Committee, who monitors the management of funds and reviews the Investment Policy. Please refer to the Investment Section (pages 31 - 40) of this CAFR for additional information on investments.

Significant Events of the Year

During the fiscal year 2006/2007, significant events included:

(1) The Investment Pool remained rated 'AAAf/S1' by Standard & Poor's, a nationally recognized rating agency. This rating reflects the extremely strong protection the Investment Pool's portfolio investments provide against losses from credit defaults. The 'S1' volatility rating signifies that the Investment Pool possesses low-sensitivity to changing market conditions, given its low-risk profile and conservative investment policies. Rating considerations included:

- Low exposure to market risk, by virtue of conservative investment policies and practices.
- Limited use of leverage.
- High standards for credit quality and diversification.
- High degree of liquidity resulting from maturity profile and composition of Investment Pool participants.
- Strong ability to forecast ongoing cash requirements.
- Solid management oversight and operational controls.

(2) After seventeen consecutive increases to the federal funds target rate, the Federal Open Market Committee (FOMC) left the rate unchanged at 5.25% throughout fiscal year 2006/2007. The FOMC cited slowing economic growth and a "substantial cooling in the housing market" as reasons to maintain its neutral position. During the first six to eight months of fiscal year 2006/2007, the Investment Pool investments were kept in uncharacteristically short maturities in anticipation of funding the new Benchmark Portfolio.

County of San Diego's Economic Condition

Like the national economy, the County has been impacted by the housing slump for most of fiscal year 2006/2007. As expected, the housing slowdown has impacted job growth in the construction industry. However, local economists believe that the slump will be confined to calendar year 2007 since the demand for housing in the County far exceeds the supply. Overall, the economy will be modestly impacted by the slowdown because other employment sectors, specifically tourism and hospitality, continue adding jobs at a constant pace and total visitor spending increased nearly 5% in 2006.

The County of San Diego has maintained fiscal stability within the discipline of the General Management System that establishes strong fiscal management practices. The fiscal discipline has allowed the County to allocate \$55.5 million to the general fund reserves since fiscal year 2003/2004. This set aside will be applied to meet the needs of unforeseen economic and operational uncertainties that may arise during fiscal year 2007/2008. The County's fiscal responsibility was validated by the recent upgrade in its general obligation debt rating from "AA" to "AA+/Aa2" from all three rating agencies: Standard & Poor's, Moody's and Fitch Ratings.

Awards and Acknowledgement

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Investment Pool for its Comprehensive Annual Financial Report (CAFR) for the year ended June 30, 2006. This was the ninth consecutive year that the Investment Pool has achieved this prestigious award. In order to be awarded a Certificate of Achievement, the Treasurer's Office must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both accounting principles generally accepted in the United States of America and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe this current report continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to GFOA to determine its eligibility for another certificate.

The preparation of this report would not have been possible without the efficient and dedicated services of many individuals in the Treasurer's Office. It is intended to provide complete and reliable information as a basis for making management decisions, as a means of determining compliance with legal provisions and determining responsible stewardship of the funds in the Investment Pool.

Requests for Information

This financial report is designed to provide a general overview of the Investment Pool's activities during fiscal year 2006/2007. Questions concerning any of the information provided in this report or requests for additional financial information, including a complete list of the Investment Pool's current holdings, should be addressed to the Office of San Diego County Treasurer-Tax Collector, 1600 Pacific Highway, Room 152, San Diego, California, 92101. Copies of the comprehensive annual financial report will also be available on the Internet at www.sdtreastax.com.

Respectfully,

Dan McAllister
San Diego County Treasurer - Tax Collector

Certificate of Achievement for Excellence in Financial Reporting

Presented to

San Diego County
Treasury, California

For its Comprehensive Annual
Financial Report
for the Fiscal Year Ended
June 30, 2006

A Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers Association of the United States and Canada to government units and public employee retirement systems whose comprehensive annual financial reports (CAFRs) achieve the highest standards in government accounting and financial reporting.

INDEPENDENT AUDITOR'S REPORT

Board of Supervisors
County of San Diego, California

We have audited the accompanying basic financial statements of the San Diego County Investment Pool (the "Investment Pool") of the County of San Diego, California, as of and for the year ended June 30, 2007. These financial statements are the responsibility of the Investment Pool's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Investment Pool's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in Note 1, the financial statements present only the Investment Pool and do not purport to, and do not, present fairly the financial position of the County of San Diego, California, as of June 30, 2007, and the changes in its financial position for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Investment Pool as of June 30, 2007, and the changes in its financial position for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The management's discussion and analysis on pages 20 through 22, is not a required part of the basic financial statements but is supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements of the Investment Pool. The introductory, investment and statistical sections are presented for purposes of additional analysis and are not a required part of the basic financial statements. The introductory, investment and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

San Diego County Investment Pool Management's Discussion and Analysis Unaudited. June 30, 2007

As management of the San Diego County Investment Pool (the "Investment Pool"), we offer readers of the Investment Pool's financial statements this narrative overview and analysis of the financial activities of the Investment Pool for the year ended June 30, 2007.

The following analysis primarily focuses on the Investment Pool's current year results in comparison with the prior year. We hope that the information presented here, and in the Letter of Transmittal, provides you with a solid understanding of the Investment Pool's financial status as of June 30, 2007.

Financial Results

- The assets of the Investment Pool exceeded its liabilities at the close of the most recent fiscal year by \$4.6 billion (net assets).
- The Investment Pool's total net assets increased by \$562.4 million. This represents a net increase of 14% over the last fiscal year.
- The net investment income of the Investment Pool increased by 9.0% from \$169.0 million for the year ended June 30, 2006 to \$184.3 million for the year ended June 30, 2007.
- During the year, the Investment Pool distributed \$202.2 million to participants compared to the previous year's distribution of \$136.2 million. This represents an increase of \$66.0 million (48.5%) over the last fiscal year.
- The Investment Pool's expense ratio was competitive at 0.14% of the average daily balance for the fiscal year 2006/07 and 0.13% for the fiscal year 2005/06.
- The fair value of the Investment Pool showed an undistributed and net unrealized loss of \$4.3 million (0.1% of portfolio fair value) at June 30, 2007 compared to an undistributed and net unrealized gain of \$19.1 million (0.5%) at June 30, 2006.

During fiscal year 2006/2007, the Federal Open Market Committee (FOMC) did not change interest rates. In the latter portion of fiscal year 2005/2006, the investment team began to extend the weighted average maturity of the fund to lock in higher rates. This strategy enabled the Investment Pool to invest in yields which were relatively higher, increasing distributable earnings by more than \$66.0 million allowing for a distribution increase to its participants by 48.5%.

Overview of the Investment Pool Financial Statements

This discussion and analysis are intended to serve as an introduction to the basic financial statements. The Investment Pool's basic financial statements consist of two components:

- 1-A) Statement of Net Assets,
1-B) Statement of Changes in Net Assets
- 2) Notes to the Basic Financial Statements.

This report also contains other supplementary information in addition to the basic financial statements themselves.

The Statement of Net Assets presents information on the Investment Pool's assets and liabilities, with the difference between the two reported as *net assets*.

Net Assets

The Investment Pool net assets increased by \$562.4 million (14%) for the year ended June 30, 2007 primarily due to increased deposits by Investment Pool participants.

A summary of the Investment Pool's net assets is presented on the next page.

Statement of Net Assets

	2007	2006	Increase/(Decrease) Amount	Percentage
ASSETS				
Investments at Fair Value	\$ 4,550,151,971	\$ 3,993,868,555	\$ 556,283,416	13.93%
Cash and Receivables	81,004,339	55,504,684	25,499,655	45.94%
Total Assets	4,631,156,310	4,049,373,239	581,783,071	14.37%
LIABILITIES				
Distributions Payable and Accrued Expenses	64,545,225	45,195,075	19,350,150	42.81%
Total Liabilities	64,545,225	45,195,075	19,350,150	42.81%
Net Assets held in Trust for Pool Participants	\$ 4,566,611,085	\$ 4,004,178,164	\$ 562,432,921	14.05%

Changes in Net Assets

The Statement of Changes in Net Assets presents information on how the Investment Pool's net assets changed during the most recent fiscal year. The additions include additions to investments, interest income and changes in fair value of investments. Unrealized gains or losses of securities are determined by taking the difference between amortized cost and the fair value of investments. The deductions consist of deductions from investments, distributions to Investment Pool's participants and administrative expenses.

All changes in net assets are reported as soon as the underlying event giving rise to the change occurs, regardless of timing of related cash flows. Thus, additions and deductions are reported in this statement for some items that will only result in cash flows in future fiscal periods.

A summary of the changes in the Investment Pool's net assets is presented on the next page.

Statement of Changes in Net Assets

	2007	2006	Increase/(Decrease) Amount	Percentage
ADDITIONS				
Additions to Pooled Investments	\$ 11,909,698,604	\$ 28,473,113,569	\$ (16,563,414,965)	-58.17%
Net Investment Income	184,286,445	169,044,590	15,241,855	9.02%
Total Additions	12,093,985,049	28,642,158,159	(16,548,173,111)	-57.78%
DEDUCTIONS				
Deductions From Pooled Investments	11,325,005,688	28,629,147,195	(17,304,141,507)	-60.44%
Distributions to Participants	202,150,125	136,174,373	65,975,752	48.45%
Administrative Expenses	4,396,315	3,957,556	438,759	11.09%
Total Deductions	11,531,552,128	28,769,279,124	(17,237,726,996)	-59.92%
Changes in Net Assets	562,432,921	(127,120,965)	689,553,886	-542.44%
Net Assets Beginning of Year	4,004,178,164	4,131,299,129	(127,120,965)	-3.08%
Net Assets End of Year	\$ 4,566,611,085	\$ 4,004,178,164	\$ 562,432,921	14.05%

Additions to pooled investments decreased by \$16.6 billion, or 58.2%, from the previous year. Deductions from pooled investments decreased by \$17.3 billion, or 60.4%, from the previous fiscal year. In prior years, the Investment Pool reports included interfund activity in additions and deductions. In the current year, the report has been revised to reflect the elimination of interfund activity. The report is now on a net cash inflow and outflow basis which management believes is more representative of the Investment Pool's inflows and outflows and accounts for the significant decrease in additions and deductions in comparison to the prior year. However, investment income increased as both the average amount invested in the Investment Pool and the average yield of investments increased during the

fiscal year. The increased average amount invested is the result of increased property tax revenues and financing activities. The net investment income increased by \$15.2 million, or 9.0%, for the fiscal year ended June 30, 2007.

The Investment Pool is managed for the sole benefit of the participants. All income is distributed quarterly after deducting investment and administrative costs. Distributions to participants increased by \$66.0 million, 48.5%, due to increased earnings in the Investment Pool. Administrative expenses increased by \$439 thousand, or 11.1%, over the previous year. The overall net increase in net assets was \$562.4 million for the year ended June 30, 2007 and \$127.1 million net decrease for June 30, 2006.

San Diego County Investment Pool Notes to the Basic Financial Statements For the Year Ended June 30, 2007

Summary of Significant Accounting Policies

The Financial Reporting Entity

The San Diego County Investment Pool (the "Investment Pool") is a part of the County of San Diego and is responsible for approximately \$4.6 billion in assets as of June 30, 2007. The Investment Pool is administered by the Treasurer-Tax Collector, an elective office that is responsible for tax collection, banking, investment, disbursement and accountability of public funds. The Investment Pool

is managed by the County Treasurer's Office on behalf of the Investment Pool participants.

The Investment Pool participants include the County, local school districts, local community colleges and other districts and agencies. The local school districts are required by State statutes to deposit their funds with the County of San Diego. "Mandatory" participants in the Investment Pool comprise the majority of the Investment Pool's assets, approximately 98%. All participants comply with the same requirements per the Investment Policy. The State of California gives the Board of Supervisors the ability to delegate the investment authority to the County Treasurer's Office in accordance with Section 53607 of the California

Government Code. The Investment Pool's investment objectives are to safeguard principal, meet the liquidity needs of the participants, and return an acceptable yield within the parameters of prudent risk management.

Pursuant to Sections 27130-27137 of the California Government Code, the Board of Supervisors has established the Treasurer's Oversight Committee (TOC) that monitors and reviews the Investment Policy. The TOC consists of members appointed from the districts or offices that they represent, and up to five members of the public, having expertise in, or an academic background in public finance. This Committee requires a financial audit to be conducted annually on a fiscal year basis, which includes limited tests of compliance with laws and regulations. The Investment Pool is not registered with the Securities and Exchange Commission (SEC) as an investment company. The Investment Pool does not have any legally binding guarantees of share values.

The Treasurer's financial report for the year ended June 30, 2006 included dedicated investments that resided outside the Investment Pool. In order to be consistent with Section 27134 of the California Government Code and as this report is presented to the Treasury Oversight Committee and Investment Pool participants, the non-pool investments are not included in the June 30, 2007 financial statements. The non-pool investments are presented in the County's Comprehensive Annual Financial Report for the year ended June 30, 2007.

Measurement focus, basis of accounting and financial statement presentation

The accompanying financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting. Earnings on investments are recognized as revenue in the period in which they are earned and administrative costs are recognized as expense when incurred, regardless of the timing of related cash flows. Investment Pool

participants' cash balances and withdrawals are based on cost while investments are reported at fair value.

Assets, liabilities and net assets

1. **Deposits:** At year-end, the carrying amount of the Investment Pool's deposits was \$23,540,749 while the related bank balance with various financial institutions totaled \$23,534,858. The bank balance amount with various financial institutions consisted of \$21,843,858 in demand deposits and \$1,691,000 in insured time deposits. Of the total bank balance amount, \$1,891,000 was covered by federal deposit insurance and \$21,643,858 was collateralized with securities held by the pledging financial institution in the County's name. The County is also in compliance with State statutes that require depositories having public funds on deposit to maintain Investment Pool securities with the agent of the depository having a market value of at least 10% in excess of the total amount of all public funds on deposit.

Custodial Credit Risk. The Investment Pool does not have a formal policy regarding sweep (deposit) accounts, but the practice is to utilize national or state chartered banks where the excess over FDIC insurance is invested in repurchase agreements that are collateralized by U.S. Treasury and Federal Agency securities equal to or greater than the deposit amount in accordance with California Government Code.

2. **Pool Investments:** The Investment Pool operates under the prudent person standard. Specifically, California Government Code Sections 27000.1-27000.5, 27130-27137, and 53600-53686 authorize the Treasurer to invest funds in permissible types of investment or financial instruments. These include: U.S. treasuries, Federal agencies, local agency obligations, banker's acceptance, commercial paper, medium-term notes, negotiable certificates of deposit, repurchase and reverse repurchase agreements, pass-throughs, money market mutual funds, and local agency investment funds.

Investment Pool Policy Restrictions versus Government Code 53601 Requirements

Investment Type	Maximum Maturity		Maximum % of Portfolio		Maximum % with One Issuer		Minimum Rating

(1) Maximum exposure per issuer - The maximum exposure to a single issuer shall be 5% of the portfolio when the dollar weighted average maturity is greater than 5 days, 10% of the portfolio when the dollar weighted average maturity is 5 days or less.

(2) Maximum exposure per issue - The maximum exposure to a single Repurchase Agreement (RP) issue shall be 10% of the portfolio value for RP's with maturities greater than 5 days, 15% of the portfolio for RP's maturing in 5 days or less.

(3) Limited to equipment leasebacked certificates, consumer receivable pass-through certificates or consumer receivable-backed bonds.

The Investment Pool's primary objective is to safeguard the principal of the funds. The secondary objective is to meet the liquidity needs of the participants. The third objective is to achieve an investment return on the funds within the parameters of prudent risk management.

Investments in the Investment Pool are stated at fair value. Securities, which are traded on a national exchange, are valued at the last reported sales price at current exchange rates. The fair value of investments is determined monthly and is provided by the custodian bank. Repurchase Agreements and Institutional Money Market funds are carried at portfolio book value (carrying cost). Open-end Institutional Money Market funds are not categorized as to custodial credit risk because the investment in these funds is not evidenced by specific securities. All purchases of investments are accounted for on a trade-date basis. Unrealized gains or losses of

securities are determined by taking the difference between amortized cost and the fair value of investments. The calculation of realized gains and losses is independent of the calculation of the net change in the fair value of investments. Realized gains and losses on investments that were held in more than one fiscal year and sold in the current year were included as a change in the fair value of investments reported in the prior year(s) and the current year. The Investment Pool is authorized to have leverage exposure through the use of Reverse Repurchase Agreements (RRP) and Securities Lending. The maximum exposure is 20% of the total portfolio. There were no RRP's or securities lending transactions during the fiscal year.

As of June 30, 2007, the maturity levels and credit ratings by investment type are presented in the following table. The balances are reported using the weighted average days to maturity (WAM) method.

San Diego County Investment Pool - Fair Value - June 30, 2007

The entire portfolio is not subject to custodial credit risk.

	S&P Rating	Rate Range %	Maturity Date Range	Par Value (000)	Amortized Cost (000)	Fair Value (000)	Yield To Maturity	WAM (In Days)

* Time Deposits are classified as Cash on Hand and In Banks

(1) These represent U.S. agencies whose debt is not guaranteed by the U.S. government and is greater than 5% of pooled investments.

Concentration of Credit Risk. This is the risk of loss attributed to the magnitude of a government's investment in a single issuer. The Investment Policy limits the amount of exposure to any one single issuer to five percent. An exclusion to this limit is dependent upon the weighted average days to maturity for commercial paper. If the weighted average number of days is 5 days or less, the issuer limit can increase to ten percent to the total portfolio. The Government Code requires specific percentage limitations for a particular category of investment and limits the purchase of commercial paper to no more than ten percent of the outstanding commercial paper of any single issuer. Investments are in compliance with State law. At June 30, 2007 the Investment Pool's exposure to Negotiable Certificates of Deposit issued by Fortis Bank New York was 5.8%. On the date of purchase, these investments were 4.97% of the Investment Pool. Government Code 53601 requires that when determining a percentage limitation, that percentage is only applicable at the date of purchase. A later increase or decrease in a percentage resulting from a change in values or assets shall not constitute a violation of that restriction. The Investment Policy is silent in this area, but was applied consistent with State code. Please see the table on page 27.

Credit Risk. The Investment Policy limits investments to the following table. The asset allocation with respect to the credit quality is based on the Standard & Poor's Fund Credit Quality Rating Matrix. The matrix incorporates the ratings of short-term securities to the overall portfolio credit quality rating categories presented below. For example, the short-term ratings of A-1+ or A-1 are assigned a credit factor and score equivalent to a 'AAA' rated security.

Credit Rating Risk	Minimum Fund%	Maximum Fund %
AAA	67	100
AA	0	33
A	0	13

Custodial Credit Risk. The County of San Diego is not subject to custodial credit risk. The County of San Diego utilizes third party delivery versus payment custodian which mitigates any credit risk. No level three investments were held. The Investment Policy does not permit investments in uninsured and unregistered securities not held by the County. However, the Investment Policy does permit for securities lending transactions. The portfolio has not been exposed to these types of investments during the fiscal year.

Foreign Currency Risk. The Investment Pool does not have any foreign currency risk as all investments in the Investment Pool are in U.S. dollar-denominated assets.

Interest Rate Risk. The Investment Pool is banned from purchasing Inverse Floaters, Range Notes, Interest only strips derived from an Investment Pool of mortgages, and any security that could result in zero interest accrual. It is limited on maturity levels, which in turn, allows the Investment Pool to manage its exposure to fair value losses arising from increased rates.

As an element of interest rate risk, the Investment Pool has maintained compliance with the Investment Policy, which requires 25% of securities to mature in 90 days, 25% to mature from 91-365 days, and no more than 50% to mature in one to five years.

The County was in full compliance with its own more restrictive Investment Policy, and therefore was also in compliance with State Code.

California State Code Section 53601 indicates where the Code does not specify a limitation on the term or remaining maturity at the time of the investment, no investment shall be made in any security, other than a security underlying a repurchase or reverse

repurchase agreement or securities lending agreement authorized by this section, that at the time of the investment has a term remaining to maturity in excess of five years, unless the legislative body has granted express authority to make that investment either specifically or as a part of an investment program approved by the legislative body no less than three months prior to the investment.

State law does not limit exposure to the issuer per each type of security and it is silent on limiting exposure to each issue. Accordingly, the County believes it is not at measurable risk as to the four risk areas cited above.

3. Receivables and Payables Receivables primarily consist of interest accrued on investments. The payables represent the interest for the last quarter that will be credited to Investment Pool participants and earnings are reinvested. Accrued expenses represent the administrative fees for the last quarter of the fiscal year 2006/2007.

4. Interest Apportionment Earnings realized on investments based on amortized cost are distributed to Investment Pool participants and are calculated using the accrual basis of accounting. Section 27013 of the California Government Code authorizes the Treasurer’s Office and Auditor & Controller’s Office to deduct administrative fees related to investments. The net realized earnings on investments are apportioned to the Investment Pool participants quarterly, based on the participant’s average daily balances. During the year ended June 30, 2007, the Investment Pool distributed \$202.1 million of investment earnings compared to the previous year’s distribution of \$136.2 million. These investment earnings are classified as distributions to participants on the Statement of Changes in Net Assets and are reinvested into the Investment Pool.

5. Use of Estimates The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

6. Investment Pool Composition The County portion of the Investment Pool net assets as of June 30, 2007 is \$1.9 billion. As of June 30, 2007, the Investment Pool participants by percentage of net assets consist of:

Participants	
Schools	43.39%
County Funds	41.44%
Community Colleges	8.25%
Non County Funds	5.31%
Voluntary Depositors	1.70%
Undistributed and Unrealized Losses	-0.09%
Total	100.00%

7. Related Party Certain costs are allocated by the Investment Pool which includes salaries and benefits, services and supplies, overhead and equipment and totaled \$4.4 million in the current fiscal year.

The image features a dark blue overlay on a background of a financial newspaper. At the top, there is a candlestick chart with a '200 DAY MOVING AVG' line and an upward-pointing arrow. Below this, the word 'INVESTOR' is printed in large, bold letters. In the center, a pair of glasses is positioned over a section titled 'S&P 500' with the subtitle 'Daily high, low and close price and volume from Sept. 24 to March 25'. This section contains a line graph with three numbered callouts (1, 2, 3). At the bottom left, another 'S & P 500' title is visible, along with some partially legible text: 'crucial', 'to St.', 'tion', 'ough it', 'al the', 'mean', 'cks'.

Investment Section

Administrative Overview

The San Diego County Investment Pool (the "Investment Pool") was created when the State Legislature established the five-member County Board of Supervisors in 1853. During fiscal year 2006/2007 the Investment Pooled Money Fund activities included the following:

- During the year, the Investment Pool structure has remained in compliance with the Investment Policy, which requires 25% of securities to mature in 90 days, 25% to mature from 91-365 days, and no more than 50% to mature in one to five years; as of June 30, 2007 the Investment Pool has 78% maturing less than one year.
- The Investment Pool had a decrease in weighted average days to maturity from 177 days at June 30, 2006 to 171 days at June 30, 2007.
- The Investment Pool's total net assets increased by 14% from \$4.00 billion on June 30, 2006 to \$4.57 billion on June 30, 2007.
- The unrealized change in the fair value of investments decreased from \$19.1 million loss at June 30, 2006 to \$4.3 million loss at June 30, 2007.
- The weighted average effective yield (annualized) of the Investment Pool increased from 4.30% for the year ended June 30, 2006 to 5.23% for the year ended June 30, 2007.
- The Investment Pool's expense ratio remained competitive at 0.13% of the average daily balance

for the fiscal year 2005/2006 and 0.14% for 2006/2007.

- The Investment Pool maintained an 'AAAf/S1' rating by Standard & Poor's, a nationally recognized rating agency.

Outline of the Investment Policy

The Investment Pooled Money Fund is managed in accordance with prudent money management principles and California State Law Sections 27000.1 – 27000.5, 27130 – 27137, and 53600 – 53686.

The objectives of the Investment Pooled Money Fund in order of importance are:

1. Safeguard the principal of the funds under the control of the Treasurer's Office.
2. Meet the liquidity needs of participants.
3. Achieve an investment return on the funds under control of the Treasurer within the parameters of prudent risk management.

On an annual basis, the Treasurer's Oversight Committee (TOC) reviews and approves the Investment Policy. Once the TOC has recommended approval, the Board of Supervisors reviews and adopts the Investment Policy in a public forum. The Investment Policy focuses on risk management by setting limits on principal exposure by type of security, by issuer of debt, by minimum credit ratings; limits on liquidity by placing return as the least important compared to safety and liquidity.

The Investment Policy includes a detailed section on terms and conditions for Voluntary Participants' deposits and withdrawal of funds from the Investment Pool. All investment transactions are handled by the internal Investment Officers.

Investment Results

The Investment Pooled Money Fund outperformed the custom index during the year. The average monthly annualized market value return for the fund during the fiscal year 2006/2007 was at 0.517% while the average monthly annualized market value return for the index was 0.435%. The custom index is made up of the following components:

Investment Type	Maturity Range	Allocation
Treasuries	1 – 3 years	24.00%
Treasuries	3 – 5 years	24.00%
T-Bills	0 – 3 months	12.50%
T-Bills	3 – 6 months	9.00%
T-Bills	6 – 9 months	9.00%
T-Bills	12 months	9.00%
US Libor	1 month	6.25%
US Libor	3 months	6.25%

A chart of the Investment Pooled Money Fund versus custom index is shown below.

Income Allocation

The interest earned by each Investment Pool participant is proportionate to the average daily balance of the local agency. Prior to distribution, expenses incurred by the County are deducted from the realized earnings of the Investment Pooled Money Fund. The Investment Pool's expense ratio for fiscal year 2006/2007 was 0.14% of the average daily balance. The apportionment rate is set approximately two weeks after each calendar

quarter-end. Apportionments are not paid out by warrants; all earnings are reinvested in the Investment Pool.

Economic Environment

Federal Reserve Actions in 2006/2007

The Federal Reserve Open Market Committee did not move the federal funds rate once during the reporting period. Each statement that accompanied their meetings mentioned inflation risk as their main

concern. Even as some economists started to raise concern about the economy in the spring, Federal Reserve chairman Ben Bernanke and the committee did not alter the 5.25% rate. The markets perception that the Federal Reserve was going to have to lower interest rates drove the yield curve to a positive slope in March 2007. The curve started inverting in January 2005 and flipped back and forth until March 2007.

Gross Domestic Product during the reporting period was mixed. Two quarters were at 1.1 and .6, while the remaining two quarters were 2.1 and 3.8. Leading indicators were flat or negative for 8 out of the 12 months. Concerns about the housing market lingered from last year as housing starts dropped 16% from the beginning of the year to the end. These factors and uncertainty surrounding news about problems in the sub prime mortgage market ignited fears of a possible recession.

Fiscal Year 2006/2007 Market Conditions

Ignoring the economic news and focusing on possible Federal Reserve rate cuts, the Dow Jones Industrials soared 20%. Similarly the NASDAQ rose 19% during the same period. Portfolio investing was focused on creating and trying to outperform a benchmark. The benchmark was created with the aid of Chandler Investment Advisors. The portfolio was split into two segments; long-term and short-term. This strategy has allowed us to track performance against a custom benchmark on an ongoing basis.

Current Fiscal Year 2006/2007

The Federal Funds Futures Index predicts the funds rate to be at 5.25% at the end of 2007 fiscal year. The June 2007 Federal Open Market Committee statement suggested economic growth appears to have been moderate during the first half of the year, despite ongoing adjustments in the housing sector. The Committee acknowledged that core inflation remained elevated, but should moderate over time. The Committee stated their predominant Investment Policy concern remains that inflation will fail to moderate as expected.

Local Economy

The University of San Diego's Index of Leading Economic Indicators fell 3.4% during the fiscal year. The index components include building permits, initial jobless claims, stock prices, consumer confidence, help wanted advertising and the national economy. The two biggest losers were in building permits down 6.88% and help wanted advertising which declined 9.91%.

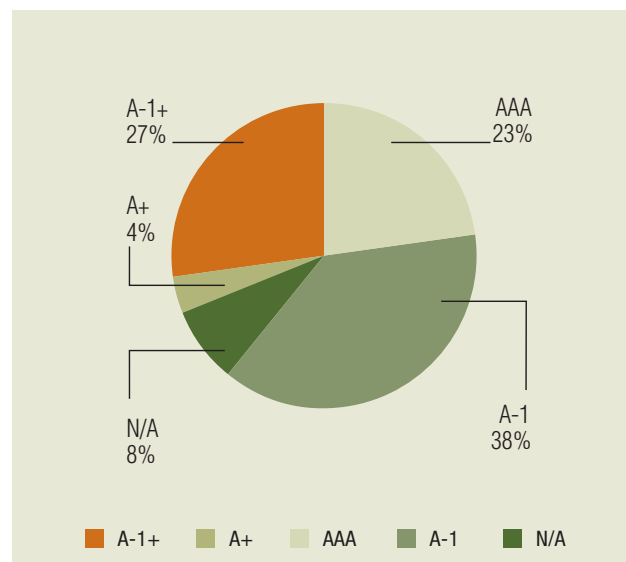

Risk Profile

The three main risk factors for the Investment Pooled Money Fund are credit, liquidity and interest rate exposure.

The credit limits of the investments held by the Investment Pool meet the requirements of the Investment Policy and California Government Code. The pie chart below displays the percentage breakdown of credit exposure for the Investment Pool.

In addition to the credit limitations, the Investment Pool is also prohibited from investing in any of the following derivative notes: inverse floater, range notes, interest-only strips derived from an Investment Pool of mortgages, and any security that could result in zero interest accrual.

Leverage Exposure

The Investment Pooled Money Fund is allowed to have leverage exposure through the use of Reverse Repurchase Agreements (RRP) and Securities Lending. The maximum exposure is 20% of the Portfolio value. There were no RRP or Securities Lending transactions during fiscal year 2006/2007.

The Investment Pool Statistics table gives a detailed listing of the Investment Pool diversification, yields by type of securities, and weighted average maturities as of June 30, 2007.

San Diego County Treasury Investment Pool Statistics - June 30, 2007

	Percent of Portfolio	Book Value at Amortized Cost	Market Price	Accrued Interest	Market Value	Unrealized Gain/(Loss)	Yield to Maturity	Weighted Average Days to Maturity

Introduction

Government Accounting Standards Board (GASB) Statement 44 "Economic Condition Reporting: The Statistical Section (an amendment of NCGA Statement 1)" requires that certain detailed statistical information be presented in this section, typically in ten-year trends, to assist users in utilizing the basic financial statements, notes to the basic financial statements, and required supplementary information in order to assess the economic condition of the Investment Pool. Provisions of this Statement require that governments preparing this statistical section are encouraged but not required, to report all years of information retroactively.

Generally this information was unavailable due to the following:

Accounting data used in the preparation of the Comprehensive Annual Financial Reports prior to the County's implementation of changes in accounting and presentation called for in GASB Statement 34 "Basic Financial Statements and Management's Discussion and Analysis-for State and Local Governments." (implemented by the County in Fiscal Year 2002) was not archived in such a manner to enable a retroactive restatement of previous years accounting data.

Non-accounting trend data called for by Statement 44 which was significantly different than data reported in previous fiscal years' statistical tables was either not available from external sources in the format required or was not available in internal archived data.

Objectives

This section presents detailed information on the Investment Pool with historical perspective as a context for understanding and using the information in the financial statements, note disclosures, and required supplementary information.

The following schedules contain five-year trend information to help the reader assess the changes over time.

Schedule of Additions, Deductions of Pooled Investments and Changes In Net Assets

This table allows the reader to evaluate the movements of increases and decreases in net assets.

Schedule of Earnings, Returns, Expenses, Apportionment Rate, Average Daily Balances (ADB) and Ratio of Fees/ADB

This table contains information to help the reader assess the Investment Pool's performance. It also presents the related expenses and its impact on returns.

Schedule of Expenses

This table presents expenses by object to help the reader evaluate the fees and expenses incurred by the Investment Pool.

Asset Allocation

This table presents historical changes in asset allocation to help the reader evaluate portfolio diversity and risk.

Asset Value by Major Participant

This table presents historical changes in the value held by the Investment Pool participants to help the reader identify and assess the major group who hold and contribute resources to the Investment Pool.

San Diego County Investment Pool - Schedule of Additions, Deductions of Pool Investments and Changes in Net Assets (1)

FOR THE FISCAL YEARS ENDED:	6/30/2007	6/30/2006	6/30/2005	06/30/2004	06/30/2003

CHANGES IN NET ASSETS	562,432,921	(127,120,965)	331,678,028	(58,653,055)	606,135,255
NET ASSETS, END OF YEAR	\$ 4,566,611,085	\$ 4,004,178,164	\$ 4,131,299,129	\$ 3,799,621,101	\$ 3,858,274,156

(1) 10 year trend data is unavailable, see explanatory information contained in Introduction to Statistical Section

(2) In prior years, the Investment Pool reports included interfund activity in additions and deductions. In the current year, the report has been revised to reflect elimination of interfund activity. The report is now on a net cash inflow and outflow basis which management believes is more representative of the Investment Pool's inflows and outflows and accounts for the significant decrease in additions and deductions in comparison to the prior year.

San Diego County Investment Pool - Schedule Of Earnings, Returns, Expenses, Apportionment Rate, Average Daily Balances (ADB) And Ratio Of Fees/ADB (1)

FISCAL YEAR	INTEREST EARNINGS	EFFECTIVE YIELD	EXPENSES	NET DISTRIBUTED	APPORT. RATE	AVE. DAILY BALANCES (IN MILLIONS)	RATIO OF FEES/ADB
