November 6, 2020

San Diego County Board of Supervisors and Treasury Oversight Committee

County of San Diego | San Diego County Administration Center, San Diego, California 92101

I am pleased to submit the Comprehensive Annual Financial Report (CAFR) of the San Diego County Investment Pool (Pool) for the fiscal year ended June 30, 2020. This report and the annual audit are presented to demonstrate compliance with the San Diego County Treasurer's Pooled Money Fund Investment Policy (Investment Policy) dated January 1, 2020.

Responsibility for both the accuracy of the data and the completeness and fairness of the presentation, including all disclosures, rests with the management of the County Treasurer's Office (Treasury Division). A framework of internal controls has been established by management for this purpose. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

To the best of our knowledge and belief, the enclosed data are accurate in all material respects, and are reported in a manner designed to present fairly the financial position and changes in financial position of the Pool in conformity with accounting principles generally accepted in the United States of America (GAAP) and audited in accordance with auditing standards generally accepted in the United States of America. All disclosures necessary to enable the reader to gain an understanding of the Pool's financial activities have been included.

The Pool's financial statements have been audited by Brown Armstrong Accountancy Corporation, an independent firm of licensed certified public accountants. The goal of the independent audit is to provide reasonable assurance that the Pool's financial statements as of and for the fiscal year ended June 30, 2020, are fairly stated in accordance with GAAP. The independent audit involves performing procedures to obtain evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used, and evaluating the overall financial statement presentation. Based upon the audit, the independent auditors concluded that there was a reasonable basis for rendering an unmodified ("clean") opinion that the Pool's financial statements as of and for the fiscal year ended June 30, 2020, are fairly presented in accordance with GAAP. The independent auditor's report is presented as the first component of the Financial Section of this report.

Management provides a narrative introduction, overview and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The Pool's MD&A can be found after the independent auditor's report.

PROFILE OF THE SAN DIEGO COUNTY INVESTMENT POOL

The Pool was created when the State Legislature established the five-member San Diego County (County) Board of Supervisors in 1853. It is a local government pool with \$10.3 billion in investments as of June 30, 2020. The Pool is headed by the San Diego County Treasurer-Tax Collector, an elected official who is responsible for tax collection,

banking, investment, disbursement and accountability of public funds. The Pool is managed by the Treasurer's Office on behalf of Pool participants. The County of San Diego (County) portion of the Pool investments as of June 30, 2020 is \$4.2 billion while the external, non-County portion is approximately \$6.1 billion. Depositors in the Pool include both mandatory and voluntary participants located within the County.

Mandatory participants include the County, K-12 school districts, certain special districts and accounts controlled by the County Board of Supervisors. Mandatory participants are defined as those agencies required by law to deposit their funds with the Treasury Division. Mandatory participants comprise the majority of the Pool, which is approximately 91.1% as of June 30, 2020.

Voluntary participants are those agencies that are not required to place their funds in the Pool and do so only as an investment option. Voluntary participants include some cities, fire districts, special districts, and other municipal entities in the countywide area. As of June 30, 2020, voluntary participants accounted for approximately 8.7% of the Pool.

Community colleges have characteristics of both mandatory and voluntary participants. While they have limited authority to invest funds outside of the Pool, community colleges receive banking, checking, and investment services from the Treasury Division. In this financial report, they are categorized as mandatory participants.

In addition to investment management, the Treasury Division also provides banking services to all mandatory participants. These services include, but are not limited to, warrant redemption, electronic fund transfers, acceptance of deposits, and fund accounting.

INVESTMENT POLICIES AND PRACTICES

The primary objectives of the Pool, as set forth in the Investment Policy, in order of importance, are safety, liquidity, and yield. The following goals have been set for fiscal year 2021:

- Promote fiscal stability by maintaining a 'AAAf/S1' rating from Fitch Ratings;
- Review established investment and reporting processes with the goal of improving efficiency;
- Implement new vendors for custodian bank and combined investment advisor/treasury management system;
- Continue constituent outreach and increase public awareness of services offered by the Investment Division; and
- Obtain a certificate of achievement for excellence in financial reporting by the Government Finance Officers Association.

The Treasury Division updates the Investment Policy on an annual basis to ensure the integrity of the Pool and to provide guidelines for its operation, in accordance with California Government Code. Upon completion of the Investment Policy by the Treasury Division, it is presented for review to the Treasury Oversight Committee, and then to the County Board of Supervisors for their approval at a public meeting.

The maturity distribution of the Pool is limited by the Investment Policy, which places restrictions on the securities that may be purchased. Cash temporarily idle during the year was invested in negotiable certificates of deposit, obligations of the U.S. Treasury, U.S. government agencies, supranationals, commercial paper, pass-through securities, money market mutual funds, municipal bonds and corporate medium-term notes. The maturities of the investments range from one day to five years, with an average weighted maturity of 559 days. The yield to maturity (annualized) on investments as of June 30, 2020 was 1.56%.

To safeguard the investments, a custodian is employed to safekeep, settle, and accept interest payments on investments held by the Pool. To facilitate internal security and safeguards, the Investment Policy requires an annual audit and the establishment and maintenance of internal controls and procedures.

For fiscal year 2020, investments provided a 2.02% apportionment rate, which is the rate used in allocating the net earnings to the participants. The Pool's average apportionment rate over the last three and five fiscal years was 1.92% and 1.47%, respectively.

Page ii of v

The Treasury Division has implemented a system of internal controls designed to ensure the reliability of reported investment information. The Treasury Division provides monthly investment reports for the Treasury Oversight Committee, which monitors the management of funds and reviews the Investment Policy. Please refer to the Investment Section of this CAFR for additional information on investments.

SIGNIFICANT EVENTS

The Pool's rating was affirmed at 'AAAf/S1' by Fitch Ratings, Inc. 'AAAf' is the top rating possible for a local government investment pool and indicates the Pool's portfolio contains securities of the highest underlying credit quality. The 'S1' volatility rating signifies the Pool possesses very low sensitivity to market risk, given its conservative investment policies. Rating considerations include:

- High quality credit portfolio
- Liquidity management as a key objective
- Oversight that decreases operational risk
- Stable investor base
- Low sensitivity to market risk
- Industry-standard administration and systems

The Pool was not immune to effects of the onset of the COVID-19 pandemic in March 2020; however, the highquality investment portfolio and conservative investment policies protected investors from the market turmoil that ensued. Investment staff responded by dramatically increasing overnight liquidity and temporarily pausing credit investments due to uncertainties over future cash flows and credit conditions. As markets calmed in the following weeks, credit investments resumed and liquidity buffers were reduced, though they remain well above prepandemic levels. Investment staff continue to refine cash flow projections as new information is released by state, federal, and other entities and are in frequent communication with Pool participants.

The Federal Reserve (Fed) lowered the benchmark Fed funds rate by 25 basis points (bps) three times in early fiscal 2020: in August, September and October 2019. Then, in response to the onset of the COVID-19 pandemic in March 2020 and the sharp economic downturn caused by lockdown measures, the Fed implemented a further 50 bps cut and then a 100 bps cut, just two weeks apart. This dropped the target range to 0% - 0.25% (its effective minimum), where it remains today. Obviously, the Fed cutting rates to near zero resulted in significantly lower rates for short-term securities and contributed to a significant reduction of the Pool's yield. The Fed has already said they don't plan on raising rates through at least 2023, given the ongoing economic weakness resulting from the pandemic, so returns are expected to fall further and then stay near historic lows. The Pool's yield to maturity decreased by 83 bps in fiscal year 2020, even though the weighted average maturity for investments increased from 528 days to 559 days. The Pool reached a record high balance of \$12.3 billion in mid-April 2020. Growth in assets under management is due to higher assessed values and strong tax collections, bond issuance by schools and other local agencies, CARES Act transfers from the federal government, new deposits from voluntary participants, and increased confidence in the Investment pool as an investment option.

Despite modest improvement in domestic economic conditions since the onset of the COVID-19 pandemic, the Pool continues to be managed conservatively with the following measures:

- Investing primarily in U.S. Treasury, government agencies, AAA-rated supranationals, AAA-rated pass-through securities, and municipal bonds for maturities beyond three years;
- Selective purchase of corporate securities out to three years using a maturity tiering strategy; and
- Maintaining extensive liquidity buffers consisting of top-tier securities with laddered maturities between one day and one year.

NATIONAL ECONOMIC ENVIRONMENT

During the first several months of fiscal year 2020, the U.S. economy continued to grow, but the onset of the COVID-19 pandemic in March 2020 and associated lockdowns dramatically curtailed economic activity, leading to an extremely sharp downturn. After a smaller decline in the first quarter of 2020, nominal and real gross domestic product plunged by 33.3% and 31.7%, respectively, during the second quarter, which were the worst declines ever

Page iii of v

recorded. The unemployment rate soared from a low of 3.5% in February 2020 to an astronomical 14.7% by April, though it subsequently recovered somewhat to 11.1% by the end of the fiscal year. Concurrently, the labor force participation rate hit an all-time low of 60.2% in April 2020 before rebounding somewhat to 61.5% in June. Annual real wage growth turned negative in this downturn as well, but still finished up 4.1% over the fiscal year as a whole. Annual inflation metrics continued to stagnate and then fell further after the onset of the pandemic to levels well below the Fed's 2% target. By June 2020, annual Consumer Price Index (CPI) growth was only 0.7%, compared to 1.6% a year earlier. Housing prices have been much less impacted by the pandemic, with the S&P/Case-Shiller 20-City Index recording 3.47% year-over-year growth in June 2020 and remaining near its all-time high. Home sales did slow sharply when the lockdowns were implemented but improved significantly by the end of the fiscal year, perhaps due to people reevaluating their living situations during quarantine.

As stated previously, the Federal Reserve lowered the Fed funds target rate a total of five times during fiscal year 2020, ultimately dropping it to its effective minimum range of 0% - 0.25%. As economic data remains poor with full recovery expected to take several years, the Fed has already committed to keep rates unchanged through at least 2023 and until inflation rises above their 2% target, in an effort to calm markets. The 10-year US Treasury yield fluctuated during the first few months of the fiscal year, but then plunged at the onset of the pandemic and remained at historic low levels the rest of the year. The yield closed on June 30, 2020 at 0.66%, or 135 bps lower than the prior year. U.S. equity markets climbed steadily during the first several months of the fiscal year before also experiencing a sharp lockdown-related plunge; however, they recovered most or all of their losses in the following months, despite the negative economic and COVID data. The S&P 500 index gained 5.39% and the NASDAQ rose a whopping 25.64% during fiscal year 2020. World indices were again mixed, however, with the EURO STOXX 50 Index declining 6.90% and the NIKKEI rising 4.76%.

SAN DIEGO COUNTY ECONOMIC CONDITION

Economic conditions in the San Diego region during fiscal year 2020 generally followed the same trends as the nation as a whole, though the COVID-related downturn was even more pronounced. The unemployment rate within the County dropped to a low of just 2.8% in December 2019, but then soared to 15.2% in May 2020 and only recovered to 13.8% in June, above the nationwide rate. Local job losses have been most severe in the leisure and hospitality sector, as there has been a sharp decline in tourist visits and a halt in convention activity in San Diego. Despite the dramatic impacts of lockdowns on many aspects of the local economy, however, the housing market in San Diego has so far been mostly unaffected, as indicated by the 5.0% rise in the S&P/ Case-Shiller San Diego home price index between June 2019 and June 2020, when it reached a new record high. Household incomes also continued to rise, though this may have shifted in the last couple months of the fiscal year.

The County has maintained fiscal stability within the discipline of the General Management System (GMS) that establishes strong fiscal management practices. The GMS is the County's business model that guides operations and service delivery to residents, businesses, and visitors. This fiscal discipline has allowed the County to commit to maintaining a portion of Unassigned Fund Balance as a reserve that equals a minimum of two months (16.7%) of audited General Fund expenses to protect the County against expenditure and revenue volatility, natural disasters, economic downturns, or other unforeseen emergencies. Appropriation of the Reserve minimum balance requires a 4/5th vote of the Board of Supervisors. On April 21, 2020, the Board voted to temporarily suspend the minimum General Fund Reserve requirement for the duration of the COVID-19 local emergency.

Many local municipalities, including school districts, continue to take advantage of the low interest rate environment to issue bonds for a variety of purposes. As a result of the influx of bond proceeds, tax receipts, CARES Act funds, and voluntary deposits, the Pool had a significant amount of additional funds to invest during fiscal year 2020, especially after the Fed's dramatic rate cuts in March caused rates to plunge. The Pool's yield to maturity has fallen from 2.39% as of June 30, 2019 to 1.56% as of June 30, 2020.

AWARDS AND ACKNOWLEDGMENT

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Pool for its Comprehensive Annual Financial Report (CAFR) for fiscal year 2019. This was the twenty-second consecutive year that the Pool has achieved this prestigious award.

Page iv of v

To be awarded a Certificate of Achievement, the Treasury Division must publish an easily readable and efficiently organized CAFR. This report must satisfy both GAAP and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe this CAFR continues to meet the Certificate of Achievement Program's requirements and will be submitted to the GFOA to determine its eligibility for another certificate.

The preparation of this report would not have been possible without the efficient and dedicated services of many individuals in the Treasury Division. It is intended to provide complete and reliable information as a basis for making management decisions, as a means of determining compliance with legal provisions and determining responsible stewardship of the funds in the Pool.

REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the Pool's activities during fiscal year 2020. Questions concerning any of the information provided in this report or requests for additional financial information, including a complete list of the Pool's current holdings, should be addressed to the Office of San Diego County Treasurer-Tax Collector, 1600 Pacific Highway, Room 152, San Diego, California 92101. Copies of the CAFR as well as the monthly Pool results are also available at www.sdttc.com.

Respectfully, an MCl

INDEPENDENT AUDITOR'S REPORT

To the County of San Diego Audit Committee and Treasury Oversight Committee County of San Diego, California

Report on the Financial Statements

We have audited the accompanying financial statements of the San Diego County Investment Pool (the Investment Pool) of the County of San Diego (the County), California, as of and for the fiscal year ended June 30, 2020, and the related notes to the basic financial statements, which collectively comprise the Investment Pool's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control, relating to the Investment Pool, relevant to the Treasurer Tax Collector's (TTC's) preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the TTC's internal control relating to the Investment Pool Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

3

Opinion

In our opinion, the basic financial statements referred to above present fairly, in all material respects, the net position of the Investment Pool, as of June 30, 2020, and the changes in net position for the fiscal year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the Investment Pool's basic financial statements. The introductory, investment, and statistical sections are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The introductory, investment, and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated November 6, 2020, on our consideration of the County TTC's internal control over financial reporting relating to the Investment Pool and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the TTC's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the TTC's internal control over financial reporting to the Investment Pool.

Bakersfield, California November 6, 2020

Management's Discussion and Analysis

As management of the San Diego County Investment Pool (Pool), we offer readers of the financial statements this narrative overview and analysis of the financial activities of the Pool for fiscal year 2020.

The following analysis primarily focuses on the Pool's current year results in comparison with the prior year. The information presented here should be considered in conjunction with the information provided in the Letter of Transmittal.

Financial Highlights

- The assets of the Pool exceeded its liabilities at the close of fiscal year 2020 by \$10.3 billion (net position).
- The Pool's total net position increased by \$213.4 million representing a net increase of 2.1% over fiscal year 2019.
- The Pool's net investment income, which includes the change in fair value from the prior year, increased from \$298.6 million in fiscal year 2019 to \$320.6 million in fiscal year 2020.
- During fiscal year 2020, the Pool distributed earnings of \$194.1 million to participants compared to the previous year's distribution of \$206.8 million. This represents a decrease of \$12.7 million, or 6.1% below fiscal year 2019.
- The Pool's expense ratio was 0.067% of the average daily balance for fiscal year 2020 and 0.072% for fiscal year 2019.
- The fair value of the Pool included an undistributed and net unrealized gain of \$142.0 million (1.37% of the portfolio fair value) at June 30, 2020 compared to an undistributed and net unrealized gain of \$24.3 million (0.24% of the portfolio fair value) at June 30, 2019.

Overview of the Financial Statements

The Pool's annual financial report consists of four parts: (1) management's discussion and analysis; (2) basic financial statements; (3) an investment section; and (4) a statistical section, which furnishes relevant statistical data of the Pool.

Management's discussion and analysis provided here is intended to serve as an introduction to the Pool's basic financial statements. The Pool's basic financial statements consist of two components: (1) basic financial statements; and (2) the notes to the basic financial statements.

Basic financial statements. The Pool provides a statement of net position and a statement of changes in net position.

The *statement of net position* presents financial information on all Pool assets and liabilities, with the difference reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the Pool is improving or deteriorating.

The *statement of changes in net position* presents information showing changes in the Pool's net position during the most recent fiscal year. All changes in net position are reported when the underlying events giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported for some items that will only result in cash flows in future fiscal periods.

Notes to the basic financial statements. The notes provide additional information that is necessary to acquire a full understanding of the data provided in the financial statements. The notes to the basic financial statements can be found on pages 15 to 24 of this report.

Other information. In addition to the basic financial statements, detailed investment information can be found on pages 33 to 42 of this report, and statistical data for the past ten years can be found on pages 45 to 49 of this report.

Overall Financial Analysis

San Diego County Investment Pool Condensed Statement of Net Position (In Thousands)

					 Increase/(Decrease)	
		2020		2019	 Amount	Percentage
Assets						
Investments at Fair Value	\$	10,332,868	\$	10,140,149	\$ 192,719	1.9%
Other Assets		56,856		98,821	 (41,965)	(42.5%)
Total Assets		10,389,724		10,238,970	 150,754	1.5%
Liabilities						
Distributions Payable						
and Accrued Expenses		47,640		110,315	 (62,675)	(56.8%)
Total Liabilities		47,640		110,315	(62,675)	(56.8%)
Net Position Held in Trust for Pool Participants	\$	10,342,084	\$	10,128,655	\$ 213,429	2.1%

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. In the case of the Pool, assets exceeded liabilities by \$10,342,084 at the close of the most recent fiscal year.

There was a \$40 million security that matured on Sunday, June 30, 2019, and therefore was reported as cash (in-transit) as the cash did not settle with the bank until July 1, 2019. There was not an in-transit at June 30, 2020, therefore this prior year in-transit was the primary reason for the 42.5% other assets decrease over fiscal year 2019. See the Investment Section on pages 33 to 42 for further detail on investments.

The decrease in liabilities of 56.8% was primarily due to a timing difference for the distribution of quarterly interest income allocation. At June 30, 2020, distributions payable included the fourth quarter allocation, whereas at June 30, 2019, distributions payable included a portion of the third quarter allocation and the full fourth quarter allocation. Accrued expenses were consistent with the prior year with a minimal change of only 0.1%.

San Diego County Investment Pool Statement of Changes in Net Position (In Thousands)

			Increase/(E	Decrease)
	2020	20 2019 Amount		Percentage
Additions: Additions to Pooled Investments Net Investment Income Total Additions	\$ 18,477,596 320,586 18,798,182	\$ 17,708,087 298,554 18,006,641	\$ 769,509 22,032 791,541	4.3% 7.4% 4.4%
Deductions: Deductions from Pooled Investments Distributions to Participants Administrative Expenses Total Deductions	18,385,346 194,094 5,313 18,584,753	17,626,265 206,812 5,773 17,838,850	759,081 (12,718) (460) 745,903	4.3% (6.1%) (8.0%) 4.2%
Change in Net Position Net Position, Beginning of Year Net Position, End of Year	213,429 10,128,655 \$ 10,342,084	167,791 9,960,864 \$ 10,128,655	45,638 167,791 \$ 213,429	27.2% <u>1.7%</u> 2.1%

The Statement of Changes in Net Position presents information on how the Pool's net position changed during fiscal year 2020. Key elements of the change between fiscal years 2020 and 2019 are as follows:

- Increases include additions to investments, investment earnings and changes in fair value of investments. Changes in the market prompted a 32.2% increase in the fair value of investments, which ended fiscal year 2020 at \$117.8 million as compared to \$89.0 million at June 30, 2019. A falling interest rate environment was the main reason for the 3.2% decrease in net interest earnings, a decrease of \$6.7 million over fiscal year 2019.
- Unrealized gains or losses of securities are determined by taking the difference between amortized cost and the fair value of investments.
- Deductions consist of withdrawals by Pool participants, interest distributions to Pool participants and administrative expenses. The largest change to Deductions was the increase of withdrawals by Pool participants of \$759.1 million, which is a 4.3% increase over fiscal year 2019. Interest income allocations to Pool participants were \$12.7 million less in fiscal year 2020 compared to fiscal year 2019, which equated to a decrease of about 6.1%.

All changes in net position are reported as soon as the underlying event occurs, regardless of the timing of related cash flows. As a result, additions and deductions are reported in this statement for some items that will result in cash flows in future fiscal periods.

During fiscal year 2020, there was a net inflow primarily related to higher assessed property values and improved tax collections, bond issuances by schools and other local agencies, new deposits from voluntary participants. The proceeds are currently invested in the Pool and are expected to be spent over the next two to three years.

The Pool is managed for the sole benefit of its participants. All income is accrued quarterly after deducting investment and administrative costs. Distributions to participants reflect only the actual interest income received during the fiscal year and may differ from the amounts accrued. The Pool, in practice, holds most

investments to maturity, based on a detailed cash flow analysis. Therefore, any undistributed gains or losses as a result of fair value fluctuations are not reflected in the distributions to participants.

Requests for Information

This financial report was designed to provide a general overview of the Pool finances for all those interested. Questions concerning any of the information provided in this report, or requests for additional financial information, should be addressed to the San Diego County Treasurer-Tax Collector, 1600 Pacific Highway, Room 152, San Diego, California 92101.

NOTES TO THE BASIC FINANCIAL STATEMENTS

San Diego County Investment Pool Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2020

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements of the San Diego County Investment Pool (the "Pool") have been prepared in conformity with generally accepted accounting principles (GAAP) in the United States. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body of establishing governmental accounting and financial reporting principles. The more significant of the Pool accounting policies are described below.

A. Reporting entity

The Pool was originally formed in 1853 by the County Board of Supervisors (Board) to invest the assets of the County and other external parties. The Pool is a part of the County of San Diego (County) and is responsible for approximately \$10.3 billion in investments as of June 30, 2020. The Pool is administered by the Treasurer-Tax Collector, an elected office that is responsible for tax collection, banking, investment, disbursement and accountability of public funds and is managed by the County Treasurer's Office (Treasury) on behalf of the Pool participants.

Participants of the Pool include the County, local school districts, local community colleges, other districts and cities. The school districts are required by State statute to deposit their funds with the Treasury. Mandatory participants in the Pool comprise the majority of the Pool's assets, at 91.1%. All participants comply with the same requirements per the Treasurer's Pooled Money Investment Policy (Investment Policy). The State of California gives the Board the ability to delegate the investment authority to the Treasury in accordance with Section 53607 of the California Government Code (Government Code).

Pursuant to Sections 27130-27137 of the Government Code, the Board has established the Treasury Oversight Committee (TOC) which monitors and reviews the Investment Policy. The TOC consists of members appointed from the districts or offices that they represent, and up to five members of the public, having expertise or an academic background in public finance. The TOC requires a financial audit to be conducted annually on a fiscal year basis, which includes limited tests of compliance with laws and regulations. The Pool is not registered with the Securities and Exchange Commission (SEC) as an investment company. The Pool does not have any legally binding guarantees of share values.

B. Pool basic financial statements

The basic financial statements (i.e., the statement of net position and the statement of changes in net position) report information on all activities of the Pool.

C. Measurement focus, basis of accounting, and basic financial statement presentation

The accompanying basic financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting. The accompanying basic financial statements present only the statement of net position and statement of changes in net position of the Pool and are not intended to present fairly, the financial position and changes in financial position of the County as a whole in conformity with accounting principles generally accepted in the United States (GAAP). Contributions from Pool participants are recognized as contributions in the period in which they are received and distributions to Pool participants are recognized in the period in which they are allocated.

San Diego County Investment Pool Notes to the Basic Financial Statements, Continued For the Fiscal Year Ended June 30, 2020

Earnings on investments are recognized as revenue in the period in which they are earned, and administrative costs are recognized as expenses when incurred, regardless of the timing of the related cash flows. In accordance with GAAP, the Pool records investment purchases and sales on the trade settlement date. Pool participants' cash balances and withdrawals are based on the cost on the trade settlement date, while investments are reported at fair value.

In accordance with GASB Statement No. 31, Accounting and Financial Reporting for Certain Investments and for External Investment Pools (GASB Statement No. 31) and GASB Statement No. 72, Fair Value Measurement and Application (GASB Statement No. 72), the accompanying basic financial statements reflect the fair value of investments. Specific disclosures related to GASB Statement No. 31 and GASB Statement No. 72 appear in Note II.C. Pool participants' cash balances and withdrawals are based on cost. Pool revenue/loss distribution is shared on a pro-rata basis with Pool participants. Pool revenue/loss distribution is performed quarterly, net of administrative costs authorized by Government Code Section 27013. This method used to determine participants' shares sold and redeemed differs from the method used to report investments.

D. Distributions payable

The Treasury calculates and records all interest earned, received, and accrued for the Pool on a monthly basis. Gains or losses as a result of fair value fluctuations are not reflected in the apportionment to Pool participants unless a security is actually sold. Income earned on the pooled investments is apportioned quarterly based on the average daily balance of each Pool participant. Accrued expenses represent the administrative fees for the last quarter of fiscal year 2020.

E. Use of estimates

The preparation of the basic financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts in the financial statements. Actual results could differ from the estimates.

II. CASH AND INVESTMENTS

Cash and investments consisted as follows on June 30, 2020 (in thousands):

Investment Type	Fair Value		
Cash - demand deposits Investments	\$	15,196 10,332,868	
Total cash deposits and investments	\$	10,348,064	

A. Cash deposits

As of June 30, 2020, the Pool maintained accounts in two banks. The carrying amount of the Pool's total deposits was \$15,195,958 and the bank balance was \$11,289,671. The difference between the carrying amount and the bank balance includes temporary reconciling items such as outstanding checks and deposits in transit.

San Diego County Investment Pool Notes to the Basic Financial Statements, Continued For the Fiscal Year Ended June 30, 2020

Government Code Section 53652 et. seq. and the Investment Policy prescribe the amount of collateral that is required to secure the deposit of public funds. Federal Deposit Insurance Corporation (FDIC) insurance is available for funds deposited at any one insured depository institution for up to a maximum of \$250 thousand for demand deposits and up to a maximum of \$250 thousand for time and savings deposits. The aforementioned Government Code and Investment Policy require that depositories collateralize public funds with securities having a fair value of at least 10% in excess of the total amount of the deposits. These securities shall be placed in the institution's pooled collateral account and monitored by the State Treasurer of California or a mutually agreed upon third party custodian bank. At June 30, 2020, \$10,789,671 was collateralized with securities held by a depository agent on behalf of the Pool.

B. Investments

The Pool's cash and investments are invested pursuant to Investment Policy guidelines established by the County Treasurer. As permitted by the Government Code, the Treasury developed, and the Board adopted, an Investment Policy that further defines and restricts the limits within which the Treasury may invest. The investments are managed by the Treasury, which publicly posts investment activity for the Board on a monthly basis.

Government Code Sections 53601 and 53635 authorize the Treasury to invest the Pool funds (Note I) in obligations further defined in Note II.D.

C. Fair value measurements

Investments are stated at fair value and are valued on a monthly basis. The Treasury categorizes its fair value measurements within the fair value hierarchy established by GASB Statement No. 72. This pronouncement establishes a hierarchy of inputs to valuation techniques used to measure fair value and requires disclosures to be made about investment fair value measurements, the level of fair value hierarchy, and valuation techniques.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is a market-based measurement, not an entity-specific measurement.

The GASB Statement No. 72 hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of fair value hierarchy are described as follows:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets.

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, and fair value is determined through the use of models or other valuation methodologies including:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in markets that are inactive;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement. These unobservable inputs reflect the Treasury assumptions about the inputs market participants would use in pricing the asset or liability (including assumptions about risk). These unobservable inputs are developed based on the best information available in the circumstances and may include Treasury data.

The Treasury does not value any of its investments using Level 1 and Level 3 inputs. Money market mutual funds and local government investment pool (LGIP) funds are not subject to the fair value hierarchy.

The Treasury uses the market approach as a valuation technique in the application of GASB Statement No. 72. This method uses prices and other relevant information generated by market transactions involving identical or comparable assets or groups of assets.

			Fair Value Measurements				
			A	oted Prices in ctive Markets for Identical Assets	Significant Other Observable Inputs		ignificant observable Inputs
	J	une 30, 2020		(Level 1)	(Level 2)	((Level 3)
Investments by fair value level							
U.S. Government Agencies	\$	1,906,248	\$	-	\$ 1,906,248	\$	-
U.S. Treasury Notes		519,792		-	519,792		-
Municipal Bonds		79,189		-	79,189		-
Corporate Medium-Term Notes		1,038,249		-	1,038,249		-
Commercial Paper		2,029,638		-	2,029,638		-
Supranationals		1,101,661		-	1,101,661		-
Negotiable Certificates of Deposit		2,213,173		-	2,213,173		-
Pass-Through Securities		841,701			841,701		-
Total investments by fair value level	\$	9,729,651	\$	-	\$ 9,729,651	\$	-

The following table summarizes the Pool recurring fair value measurements and fair value hierarchy as of June 30, 2020 (in thousands):

Investment securities classified in Level 2 of the fair value hierarchy are valued using a matrix pricing technique. Matrix pricing is used to value securities based on the securities' relationship to benchmark quoted prices.

D. Risk Disclosures

In conjunction with the discussion below concerning investment risks, please refer to the Investment Statistics Table in the Investment Section on page 40.

1. Interest rate risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates.

To mitigate the effect of interest rate risk, the Pool maintains a laddered portfolio in compliance with the Investment Policy, which requires at least 15% of securities to mature within 90 days and at least 35% of securities to mature within one year. In addition, the Pool limits the maximum effective duration of the portfolio to 2 years. As of June 30, 2020, the Pool was in full compliance with all provisions of the Investment Policy.

Actual weighted average days to maturity (WAM) by investment type is presented in the table below (in thousands):

Investment Type	 Fair Value	Maturity Range	WAM	% of Portfolio
Investments:				
U.S. Government Agencies	\$ 1,906,248	10/30/2020 - 6/15/2025	1116	18.45%
U.S. Treasury Notes	519,792	1/30/2021 - 4/30/2025	1049	5.03%
Corporate Medium-Term Notes	1,038,249	7/22/2020 - 9/23/2022	587	10.05%
Commercial Paper	2,029,638	7/06/2020 - 11/25/2020	45	19.64%
Suppranationals	1,101,661	4/19/2021 - 4/22/2025	1176	10.66%
Negotiable Certificates of Deposit	2,213,173	7/6/2020 - 6/30/2021	92	21.42%
Local Government Investment Pools	250,292	N/A	1	2.42%
Money Market Mutual Funds	352,925	N/A	1	3.42%
Pass-Through Securities	841,701	4/15/2021 - 10/15/2024	1033	8.14%
Municipal Bonds	 79,189	2/15/2021 - 2/15/2024	950	0.77%
Total Investments	\$ 10,332,868		559	100.00%

Government Code Section 53601 indicates that when there is no specific limitation on the term or remaining maturity at the time of the investment, then no investment shall be made in any security, other than a security underlying a repurchase or reverse repurchase agreement or securities lending agreement authorized by this section, that at the time of the investment has a term remaining to maturity in excess of five years, unless the legislative body has granted express authority to make that investment either specifically or as a part of an investment program approved by the legislative body no less than three months prior to the investment.

2. Custodial credit risk

Custodial credit risk for investments is the risk that the Treasury, in the event of the failure of the counterparty to a transaction, will not be able to recover the value of investment securities or collateral securities that are in the possession of another party. Investments are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the Treasury and are held by either the counterparty, or the counterparty's trust department or agent. At

and are held by either the counterparty, or the counterparty's trust department or agent. At June 30, 2020, all Pool securities were either held by the Treasury or by the custodian bank in the name of the Treasury.

The Investment Policy requires that securities purchased from any bank or dealer including appropriate collateral (as defined by California State Law), not insured by FDIC, shall be placed with an independent third party for custodial safekeeping. Securities purchased by the Pool are held by a third-party custodian, Citibank, in their trust department to mitigate custodial credit risk.

For sweep (deposit) accounts, the Treasury utilizes national or state-chartered banks where amounts exceeding the FDIC insurance limit are invested in repurchase agreements that are collateralized by U.S. Treasury and Federal Agency securities equal to or greater than the deposit amount in accordance with Government Code.

As of June 30, 2020, the Treasury invested in primarily high-quality investments as shown below:

Credit Ratings	% of Total Investments		
AAA	57.99%		
AA+	4.44%		
AA-	6.80%		
AA	0.59%		
A+	2.96%		
A-	0.89%		
F1+	18.34%		
F1	7.99%		
Total	100.00%		

Fitch Ratings [includes all ratings in this category (e.g., AAA, A, A+)].

3. Credit risk

Investments are subject to credit risk when there is the possibility that the issuer, or other counterparty to an investment, will not fulfill its obligations, or that negative perceptions of the issuer's ability to make these payments will cause the price to decline.

The Investment Policy, which is more restrictive than Government Code, places a minimum standard on the ratings of investments held in the Pool. Investments in securities other than those guaranteed by the U.S. Treasury or Government Sponsored Enterprises must have a credit rating of no less than "A" for long-term or "F1" for short-term. Nonrated securities include sweep accounts and repurchase agreements. Sweep accounts and collateralized certificates of deposit must be FDIC insured and collateralized with securities held by a named agent of the depository. Repurchase agreements are collateralized by securities, authorized by Government Code Section 53601, having a fair value of at least 102% of the amount of the repurchase agreement. The Pool did not have any repurchase agreements in its portfolio as of June 30, 2020.

The Pool's rating was affirmed at 'AAAf/S1' by Fitch Ratings, Inc. 'AAAf' is the top rating possible for a local government investment pool and indicates the Pool's portfolio contains securities of the highest underlying credit quality. The 'S1' volatility rating signifies the Pool possesses very low sensitivity to market risk, given its conservative investment policies.

Credit quality based on Fitch's Fund Credit Quality Rating is presented below and in detail in the Investment Section on page 40:

	Pool Rating at June 30, 2020	Minimum Investment Policy Ratings at Time of Purchase
Overall credit rating	AAAf/S1	
Short-term		F1
Long-term		А

4. Concentration of credit risk

Concentration of credit risk is the risk of loss attributed to the magnitude of an investment in a single issuer. This occurs when there is a lack of diversification or having too much invested in a few individual issuers. As disclosed in the table below, the Treasury maintains an Investment Policy that establishes thresholds for holdings of individual securities. The Pool did not have any holdings meeting nor exceeded the allowable threshold levels as of June 30, 2020.

	Maximur	n Maturity		um % of tfolio		m % with Issuer		mum ting
Investment Type	Gov. Code	Invest. Policy	Gov. Code	Invest. Policy	Gov. Code	Invest. Policy	Gov. Code	Invest. Policy

Supranationals ³	5 years	5 years	30%	30%	30%	10%	AA	AA

¹Government Code Section 53635(a)(1-2) specifies percentage limitations for this security type for county investment pools.

²Maximum exposure per issue - The maximum exposure to a single Repurchase Agreement (RP) issue shall be 10% of the portfolio value for RP's with maturities greater than 5 days, and 15% of the portfolio for RP's maturing in 5 days or less. The maximum exposure to a single broker/dealer of Repurchase Agreements shall be 10% of the portfolio value for maturities greater than 5 days, and 15% of the portfolio value for maturities greater than 5 days, and 15% of the portfolio value for maturities greater than 5 days, and 15% of the portfolio value for maturities greater than 5 days, and 15% of the portfolio value for maturities of 5 days or less.

³The following institutions are considered "Supranationals": International bank for Reconstruction and Development (IBRD), International Finance Corporation (IFC), Inter-American Development Bank (IADB).

As of June 30, 2020, with the exception of investments that are explicitly guaranteed by the U.S. Government and investments in mutual funds, the Pool did not have any investments with more than 5 percent of the total investments under one issuer except for the following securities (in thousands):

Investment	Fair Value		% of Pool
Toyota Motor Credit Corp	\$	646,339	6.25%
Federal Farm Credit Bank (FFCB) 64		643,886	6.23%
Inter-American Development Bk		568,864	5.51%
Bank of Nova Scotia		560,668	5.43%
JP Morgan		532,827	5.16%

The Pool's holdings of Federal National Mortgage Association (FNMA) and Federal Home Loan Mortgage Corporation (FHLMC) securities are issued by agencies that remain under conservatorship by the Director of the Federal Housing Agency. The U.S. Government does not guarantee, directly or indirectly, the securities of the Federal Home Loan Bank (FHLB), Federal Farm Credit Bank (FFCB), Federal National Mortgage Association (FNMA), or Federal Home Loan Mortgage Corporation (FHLMC).

5. Foreign currency risk

The Pool does not have foreign currency risk as all investments in the Pool are in U.S. dollardenominated assets.

E. Investment income

Pool investments are accounted for in accordance with the provisions of GASB Statement No. 31 which requires governmental entities to report certain investments at fair value in the Statement of Net Position and the change in value in the year in which the change occurred. The fair value fluctuates with interest rates and increasing rates could cause the value of investments to decline below original cost. Treasury management believes the liquidity in the portfolio is more than adequate to meet cash flow requirements and to preclude the Treasury from having to sell investments below original cost for that purpose.

Pool Income						
(in Thousa	ands)					
Investment Earnings	\$	204,151				
Net Increase in Fair Value		117,750				
Less: Investment Expenses		(1,315)				
Total Pool Income	\$	320,586				

For fiscal year 2020, the Pool's investment earnings totaled \$204.2 million. During the same period, the net increase in the value of investments was \$117.8 million, which includes all changes (realized and unrealized) during the fiscal year. The GASB Statement No. 31 fair value adjustment on investments held as of June 30, 2020, was an unrealized gain of \$142.0 million.

Government Code Section 27013 authorizes the Treasury to deduct operational costs related to investments. All income is distributed quarterly to Pool participants after deducting these operational costs. Unrealized gains or losses as a result of fair value fluctuations are not reflected in the earnings distribution to participants.

III. INTEREST RECEIVABLE

Interest receivable consists of interest accrued on investments including interest purchased with certain securities. At June 30, 2020, the Pool had \$41.7 million of interest receivable.

IV. INTEREST APPORTIONMENT

Earnings realized on investments based on amortized cost are distributed to Pool participants on a cash basis and are reported using the accrual basis of accounting. Section 27013 of the Government Code authorizes the Treasury and Auditor and Controller's Office to deduct administrative fees related to investments. Please refer to the Schedule of Expenses in the Statistical Section on page 47. The net realized earnings on investments are apportioned to Pool participants quarterly, based on the participants' average daily balances. During fiscal year 2020, the Pool recognized \$194.1 million of investment earnings, compared to the previous year's amount of \$206.8 million. These investment earnings are classified as distributions to participants on the Statement of Changes in Net Position and are reinvested in the Pool.

V. POOL COMPOSITION

As of June 30, 2020, the Pool participants by percentage of net position consist of:

Participant	% of Pool
County Funds	40.89%
K-12 School Districts	42.23%
Community Colleges	7.98%
Voluntary Depositors	8.67%
Undistributed and Unrealized Gains	0.23%
Total	100.00%

VI. RELATED PARTY

The County portion of the Pool's net position as of June 30, 2020 was \$4.2 billion. Certain costs allocated by the County to the Pool include salaries and benefits, services and supplies, and overhead and equipment totaling \$5.3 million for fiscal year 2020.

VII. EFFECTS OF NEW PRONOUNCEMENTS

New Accounting Pronouncements. There were no new accounting pronouncements that affected the Pool for fiscal year 2020.

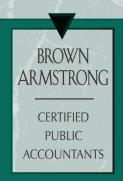

VIII. SUBSEQUENT EVENT

The County Treasurer-Tax Collector has evaluated the Pool's net position and changes in net position through November 6, 2020, the date on which the Pool's financial statements were available to be issued. As a result of the spread of the COVID-19 coronavirus, economic uncertainties have arisen which have not yet materially negatively impacted the Net Position but may negatively impact the Net Position in the future. COVID-19 has resulted in significantly lower rates for short-term securities and contributed to a significant reduction of the Pools yield.

On September 16, 2020, the Pool's rating was affirmed at 'AAAf/S1' by Fitch Ratings, Inc. 'AAAf' is the top rating possible for a local government investment pool and indicates the Pool's portfolio contains securities of the highest underlying credit quality. The 'S1' volatility rating signifies the Pool possesses very low sensitivity to market risk, given its conservative investment policies.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

To the County of San Diego Audit Committee and Treasury Oversight Committee County of San Diego, California

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the San Diego County Investment Pool (the Investment Pool) of the County of San Diego (the County), California, as of and for the fiscal year ended June 30, 2020, and the related notes to the basic financial statements, which collectively comprise the Investment Pool's basic financial statements, and have issued our report thereon dated November 6, 2020.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the County Treasurer-Tax Collector's (TTC) internal control over financial reporting (internal control) relating to the Investment Pool as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the basic financial statements, but not for the purpose of expressing an opinion on the effectiveness of the TTC's internal control relating to the Investment Pool. Accordingly, we do not express an opinion on the effectiveness of the TTC's internal control relating to the Investment Pool.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Investment Pool's basic financial statements are free from material misstatement, we performed tests of the TTC's compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the TTC's internal control or on compliance relating to the Investment Pool. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the TTC's internal control and compliance relating to the Investment Pool. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE WITH CALIFORNIA GOVERNMENT CODE SECTIONS 27134, 53601, AND 53635

To the County of San Diego Audit Committee and Treasury Oversight Committee County of San Diego, California

Report on Compliance with California Government Code

We have audited the San Diego County Treasurer-Tax Collector's (TTC) assertion that the San Diego County Investment Pool (the Investment Pool) of the County of San Diego, California, is in compliance with the applicable provisions contained in Sections 27134, 53601, and 53635 of the California Government Code (Government Code) that could have a direct and material effect on the Investment Pool for the fiscal year ended June 30, 2020. Compliance with the requirements referred to above is the responsibility of the TTC's management. Our responsibility is to express an opinion on the TTC's compliance based on our audit.

Management's Responsibility

Management is responsible for compliance with the requirements of laws, regulations, contracts, and grants.

Auditor's Responsibility

Our responsibility is to express an opinion on the TTC's compliance with the provisions contained in Sections 27134, 53601, and 53635 of the Government Code. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the Government Code. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the compliance requirements referred to above that could have a direct and material effect on the Investment Pool has occurred. An audit includes examining, on a test basis, evidence about the TTC's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on the TTC's compliance with provisions contained in Sections 27134, 53601, and 53635 of the Government Code. However, our audit does not provide a legal determination of the TTC's compliance with those requirements.

Opinion

In our opinion, the TTC complied, in all material respects, with the provisions contained in Sections 27134, 53601, and 53635 of the Government Code referred to above that could have a direct and material effect on the Investment Pool for the fiscal year ended June 30, 2020.

Report on Internal Control over Compliance

Management of the TTC is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the TTC's internal control over compliance with the types of requirements that could have a direct and material effect on the Investment Pool to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for the Investment Pool and to test and report on internal control over compliance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the TTC's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Restriction of Use

This report is intended solely for the information of the County of San Diego Audit Committee, the Treasury Oversight Committee, and management of the Investment Pool and is not intended to be, and should not be, used by anyone other than these specified parties.

INVESTMENT SECTION

This page intentionally left blank.

I. REPORT ON INVESTMENT ACTIVITIES

During fiscal year 2020, the San Diego County Investment Pool's (the "Pool") investment activities included the following:

 The Pool maturity structure has remained in compliance with the San Diego County Treasurer's Pooled Money Investment Policy (Investment Policy), which requires 15% of securities to mature within 90 days and no more than 35% to mature within one year. As of June 30, 2020, the Pool had 47.21% of investments maturing in less than one year;

- The Pool had an increase in weighted average days to maturity from 528 days at June 30, 2019 to 559 days at June 30, 2020;
- The Pool's total net position increased by 2.1% from \$10.1 billion on June 30, 2019 to \$10.3 billion on June 30, 2020;
- Undistributed and unrealized gains were \$24.3 million at June 30, 2019, compared to undistributed and unrealized gains of \$142.0 million at June 30, 2020;
- The weighted average effective yield to maturity (annualized) of the Pool decreased from 2.39% at June 30, 2019 to 1.56% on June 30, 2020;
- The Pool's expense ratio decreased from 0.072% of the average daily balance in fiscal year 2019 to 0.067% for fiscal year 2020; and
- The Pool maintained an 'AAAf/S1' rating by Fitch Ratings, a nationally recognized rating agency.

II. OUTLINE OF THE INVESTMENT POLICY

The Pool is managed in accordance with prudent money management principles and California

Government Code Sections 27000.1 – 27000.5, 27130 – 27137, and 53600 – 53686.

The primary objectives, in priority order, of the Pool investment activities are:

- 1. Safety: Safeguard the principal of the funds under the control of the Treasurer's Office (Treasury), with the goal of mitigating credit risk and interest rate risk;
- 2. Liquidity: The portfolio shall remain sufficiently liquid to meet the needs of participants; and
- 3. Return on investments: The portfolio shall achieve a competitive rate of return within the parameters of prudent risk management and the other primary goals of safety and liquidity.

The investment portfolio is managed in accordance with the parameters specified within the Investment Policy.

On an annual basis, the County Treasury Oversight Committee (TOC) reviews and approves the Investment Policy. Once the TOC has recommended approval, the Board of Supervisors reviews and adopts the Investment Policy in a public forum. The Investment Policy focuses on risk management by setting limits on principal exposure by type of security, by issuer of debt, by minimum credit ratings, and by liquidity. The Investment Policy includes a detailed section on terms and conditions for voluntary participants' deposits and withdrawal of funds from the Pool.

The Pool is actively managed, and the Investment Policy prescribes that the Treasury will observe, review, and adjust to changing conditions that affect the Pool as a full-time responsibility. Authority to execute investment transactions is limited to the following:

- County Treasurer-Tax Collector
- Chief Investment Officer
- Assistant Treasurer-Tax Collector
 Investment Officers
- Chief Deputy Treasurer

Major components of the Investment Policy are as follows:

<u>General Strategy</u>: The Investment Policy authorizes the use of a buy and hold investment strategy, where securities are purchased with the intent of holding them to maturity. The investment staff will update the TOC on its asset allocation and investment strategy at its regularly scheduled meetings. Securities may be sold prior to maturity when deemed prudent.

<u>Credit Ratings</u>. Minimum credit ratings are set forth in the Investment Policy for each type of security. These credit limits apply to the initial purchase of a security and do not automatically force the sale of a security if the credit ratings of the security fall below the Investment Policy limits. The Investment Policy also sets forth procedures to monitor credit ratings. To ensure the Pool maintains the highest overall credit rating with the contracted nationally recognized statistical rating (NRSRO), the asset allocation and portfolio holdings will be provided to the contracted NRSRO on a monthly basis.

<u>Internal Controls</u>: The Chief Deputy Treasurer is responsible for establishing and maintaining an internal control structure designed to ensure that the Pool assets are protected from loss, theft or misuse. The internal control structure shall be designed to provide reasonable assurance that these objectives are met.

<u>Reporting</u>: The Investment Policy requires an independent review to be conducted annually by an external auditor to determine if the Treasury is in compliance with the Investment Policy, other internal policies and procedures, and the California Government Code. In addition, a monthly investment report is required to be posted on the County Treasurer-Tax Collector's website.

<u>Permissible Investments</u>: California Government Codes 53601, 53601.1, 53601.2, 53601.8, 53635, 53635.8, 53637, 53638, 53651, 53652, and 53653 address permissible investments. The Investment Policy addresses individual investment categories.

<u>Qualified Brokers and Dealers</u>: In order to minimize risk in executing security transactions under the Investment Policy, security transactions will be made only through qualified dealers. Money market fund and local government investment pool transactions will be executed directly with the issuing entity.

<u>Delegation of Investment Authority to the County Treasurer</u>: The Board has the ability to delegate investment authority to the County Treasurer for a one-year period and requires annual renewal.

<u>Safekeeping Authority</u>: Board Resolution 109, adopted September 29, 1959, delegated the deposit for safekeeping authority to the County Treasurer. In exercising this function, the County Treasurer has prescribed requirements on depositories and the County Treasurer's Continuity of Operations Plan (COOP) addresses contingency plan in the event of a disaster.

<u>External Oversight</u>: The Investment Policy requires an independent third-party investment advisor to provide oversight and compliance monitoring. The Treasury has engaged Financial Main Street Advisors (FHN) for this purpose. Additionally, Fitch Ratings has been retained to fulfill the NRSRO requirement to provide a rating for the Pool.

<u>Cost and Earnings Apportionment</u>: The Investment Policy provides detail of the manner in which Pool participants will be allocated interest.

<u>Terms and Conditions for Depositing Funds by Voluntary Participants</u>: California Government Code 53684 allows local agencies, upon adoption of a resolution by a governing body, the option of depositing excess funds in the Pool.

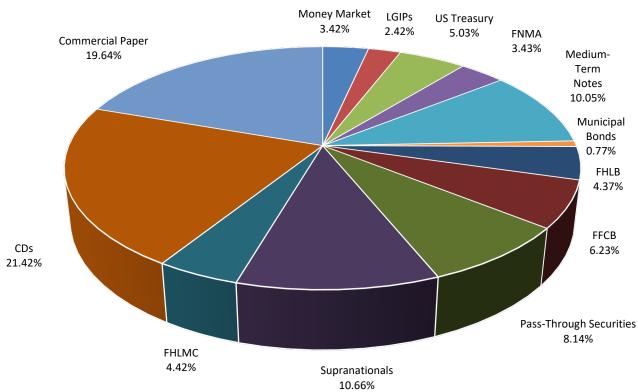

III. RISK PROFILE

The three main risk factors for the Pool are credit, liquidity and interest rate exposure. The credit limits of investments held by the Pool meet the requirements of the Investment Policy and the California Government Code. See the Notes to the Basic Financial Statements for more detail on risks of the Pool.

IV. INVESTMENT RESULTS

The objective of the Pool is to preserve capital, maintain liquidity and earn income. The County Treasury Investment Group (Investment Group) maintains a conservative approach to managing the Pool's credit risk. Specifically, the Pool invests in high quality credits and utilizes a maturity-tiering strategy that limits counterparty exposure. For maturities greater than three years, the Pool only invests in treasuries, agency securities, supranationals and other AAA-rated securities.

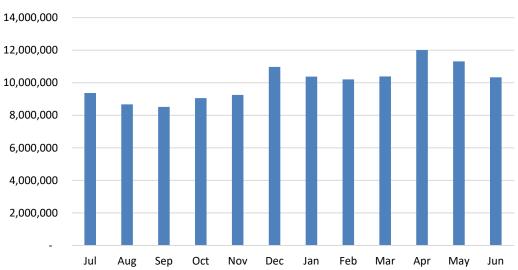

The investment distribution at June 30, 2020, is provided in the chart below:

Distribution by Investment Type

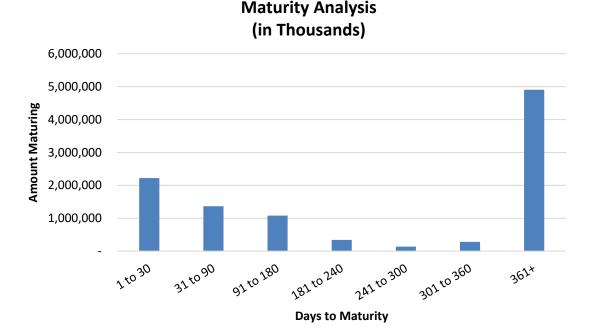

A complete list of current and historical Pool holdings is available on the Treasurer-Tax Collector's website at www.sdttc.com.

Balances fluctuated from a month-end low of \$8.5 billion in September 2019 to a month-end peak of \$12.0 billion in April 2020 as shown in the table below:

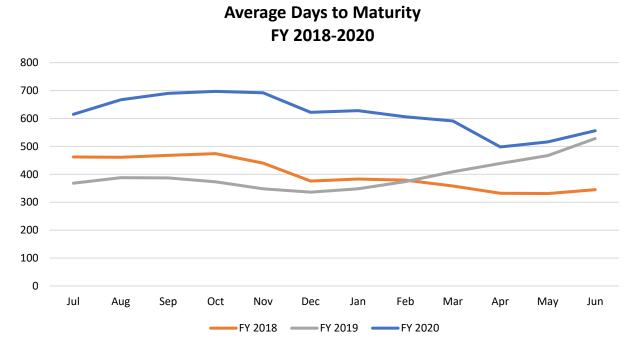

Fiscal Year 2020 Investment Balances (in Thousands)

The Treasury uses a ladder approach for Pool maturity to maintain adequate cash balances and generally reinvests unspent liquidity in money markets to cover liquidity needs over the next few days. When there is a large unspent balance, the Treasury will invest in a security for future liquidity needs. The table below provides a snapshot at June 30, 2020 of investments maturing within the next 30 days, in 60-day increments through 360 days, and 361 days through 5 years:

The apportionment rate during fiscal year 2020 was 2.02%. The apportionment 3-year average return was 1.95%, and the apportionment 5-year average return was 1.47%.

The monthly average days to maturity has fluctuated from 498 days to 697 days in fiscal year 2020. The three-year average days to maturity by month are shown in the chart below:

Mostly due to the onset of the COVID-19 pandemic, the Federal Reserve cut rates by a total of 2.25 percent in fiscal year 2020, fully erasing all increases implemented since the financial crisis in 2008. The federal funds rate at June 30, 2020 was in a range from 0.00 percent to 0.25 percent, its effective minimum. Rates are expected to remain at historic lows for the foreseeable future, as the Fed has already committed to keep them at this level through at least 2023, given ongoing economic weakness. As a result of these moves, yields on the Pool have decreased and are expected to fall further before stabilizing near historic lows.

The table below reflects the effective yield of the Pool over the past five fiscal years versus the benchmark indices.

SCHEDULE OF EXPENSES:

Fees charged to the Pool include both investment and administrative costs as shown below:

Schedule of Expenses by Category
(In Thousands)

Category	6/3	0/2020
Investment Expenses		
Banking Expenses	\$	820
Custodial Expenses		140
Application Expenses		355
Total Investment Expenses		1,315
Administrative Expenses		
Computer Related Expenses		188
Salaries and Benefits		3,598
Services and Supplies		453
Department Overhead		360
External Overhead		494
Auditor & Controller Allocated Cost		220
Total Administrative Expenses		5,313
Total Expenses	\$	6,628

Expenses are charged to Pool participants net of interest earnings and allocated on a quarterly basis. Total expenses were less than one percent of the Pool's investment balance at June 30, 2020. The interest earned by each Pool participant is proportionate to the average daily balance of the local agency. Prior to distribution, expenses incurred by the County are deducted from the realized earnings of the Pool. The Pool's expense ratio for fiscal year 2020 was 0.067% of the average daily balance. The apportionment rate is calculated approximately two weeks following the end of each calendar quarter. Apportionments are not paid out by warrant; instead, all earnings are reinvested in the Pool and allocated to each participant for the benefit of the participants.

V. LEVERAGE EXPOSURE

The Pool is authorized to leverage exposure up to 20% of the portfolio value through the use of Reverse Repurchase Agreements (RRP) and securities lending. There were no RRP's or securities lending transactions in fiscal year 2020.

The Investment Statistics table on the next page provides a detailed listing of the Pool diversification, yields by type of securities, and weighted average maturities as of June 30, 2020.

VI. OUTLOOK FOR FISCAL YEAR 2021

The decade long economic expansion grinded to a halt with COVID-19. U.S. gross domestic product (GDP) fell 5% in the first quarter of 2020 and fell 32.9% in the second quarter. Experts expect the economy to shrink by 6.5% in 2020. The path to economic recovery will ultimately depend on the course of the virus and the public health response. Against this backdrop, the Federal Reserve has vowed to keep rates near zero as the economy recovers from the pandemic. Fed Chairman Jerome Powell stated, "We're not even thinking about raising rates. What we are thinking about is providing support for the economy. We think this is going to take some time." In early March, the Fed cut the target range for its overnight funds rates to 0%-0.25%, where it was during the financial crisis. The Fed expects to maintain this range through 2023. The coronavirus has also triggered state budget shortfalls as revenues decline and costs rise. California expects revenues to decline by \$32 billion in 2021. Given the uncertainty around the expected inflows from the state, we have increased our liquidity position by reducing the duration of the portfolio and by holding more overnight liquidity. The yield on the Pool is expected to decline throughout fiscal year 2021 given the low interest rate environment. In consideration of the ongoing economic uncertainties brought on by the pandemic, the objectives of the Pool are to remain invested in securities of the highest quality and to establish enough liquidity to meet the cashflow needs of the Pool participants.

STATISTICAL SECTION

This section presents detailed information on the Pool with historical perspective as a context for understanding and using the information in the Financial and Investment Sections of this report.

The following tables contain ten-year trend information to help the reader assess changes over time.

Contents	<u>Page</u>
Table 1 - Schedule of Additions to Pool Investments, Deductions from Pool Investments, and Changes in Net Position - Last Ten Fiscal Years	45
This table allows the reader to evaluate the year-over-year changes in net position.	
Table 2 - Schedule of Earnings, Returns, Expenses, Apportionment Rate, Average Daily Balances (ADB), and Ratio of Fees/ADB - Last Ten Fiscal Years	46
This table contains information to help the reader assess the Pool's performance. It also presents the related expenses and its impact on returns.	
Table 3 - Schedule of Expenses (Investment and Administrative Costs) - Last Ten Fiscal Years This table presents expenses by object to help the reader evaluate the fees and expenses incurred by the Pool.	47
Table 4 - Asset Allocation at Fair Value - Last Ten Fiscal Years This table presents historical changes in asset allocation to help the reader evaluate portfolio diversity and risk.	48
Table 5 - Net Position by Major Participant - Last Ten Fiscal Years	49
This table presents historical changes in the value held by Pool participants to help the reader identify the entities who hold and contribute major percentages of assets to the Pool.	

Sources: Unless otherwise noted, the information in these schedules is derived from the annual financial reports for the relevant year.
